DIS-503A

Small-sized Data Logger for Crash Test

Specifications

Channels	3
Sampling Frequencies	Max.150 kHz
Impact Resistance	4903 m/s ² (500 G), 3 ms half-sine

*Specifications and design are subject to change without notice.

*Please contact us for information on product warranties.

Built-in support for pedestrian head protection impactors

- Channels: 3
- Built-in battery

This compact data logger is attached inside head-form impactors used in pedestrian head protection performance tests, to record the output of acceleration sensors also installed inside.

■ Example: Mounted in head-form impactor

Acceleration Transducer for
Crash Test
