

SJB-C/D, JBS-C

Junction Box

SJB-4D

JBS-4C

Cable extension for load cell and integration of multiple load cell outputs to a single cable

A junction box is used when connecting a load cell and amplifier using an extension cable, or when connecting cables of multiple load cells, weighing a tank or hopper, to an amplifier using a single cable.

The SJB-C/D are designed for general purposes and the JBS-C is for use under hazardous and explosive environments.

Models

Models	Connectable Load Cells	Applicable Cable Diameter	Weight (Approx.)	Remarks
SJB-1C	1	10 to 11 mm (15C)	2.3 kg	4-conductor (0.5 mm ²) shielded cable
SJB-4C	4		4.7 kg	
SJB-1D	1	7 to 8 mm (10B)	2.2 kg	4-conductor (0.3 mm ²) shielded cable
SJB-4D	4		4.4 kg	
JBS-1C	1	10 to 11 mm (Note)	—	—
JBS-4C	4		10.6 kg	

Note: Please specify the cable diameter.

Dimensions

● SJB-1C, 1D

Models	A	B
SJB-1C	234	47
SJB-1D	226	43

● SJB-4C, 4D

Models	A	B
SJB-4C	212	47
SJB-4D	208	43
